

## Mga Katangian :

Produktong solid katulad ng puting pulbos

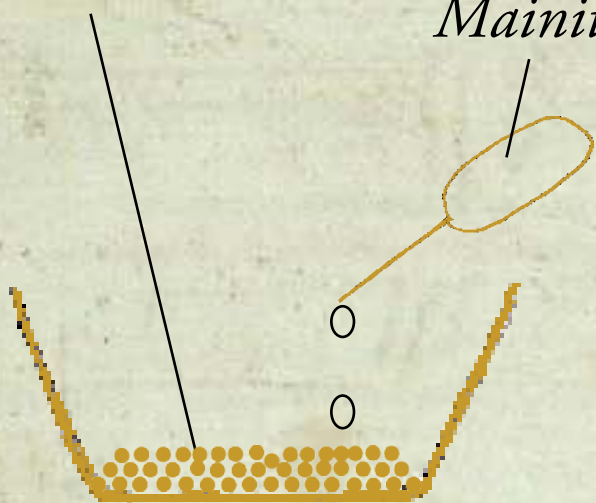

Madaling matunaw sa mainit na tubig, di-madaling matunaw sa malamig na tubig

Madaling mag-crystallize at lumamig

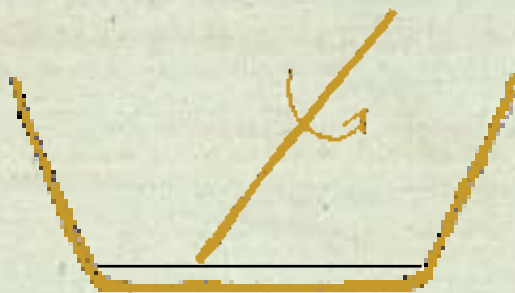

*Sodium Acetate*

*Mainit na tubig*

**1**

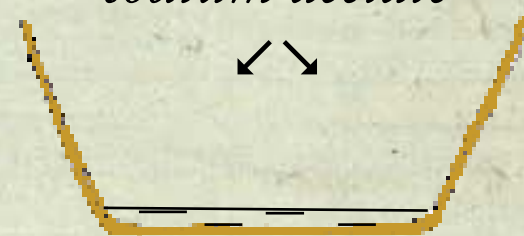

*Buhusan ng kaunting mainit na tubig ang sodium acetate.*

**2**

*Haluin hanggang lubos na matunaw.*

*Mga kristal ng sodium acetate*

**3**

*Hayaang lumamig at pagmasdan.*

*Sa chemistry, ginagamit ang **crystallization** sa paghihiwalay ng mga produkto.*
