

TOOLKIT CONTENTS

- ✓ checklists and planning guides on disaster preparedness and education in emergencies
- ✓ highlights of selected school-based DRRM good practices from Southeast Asian countries
- ✓ a list of reference materials
- ✓ a list of selected DRRM-related projects by various organizations
- ✓ overview of disaster risk profiles and DRRM efforts of SEAMEO member countries

MORE INFORMATION

There will be in-country information dissemination and orientation sessions on the use of the toolkit in selected SEAMEO member countries in 2014.

TOOLKIT FOR BUILDING DISASTER- RESILIENT SCHOOL COMMUNITIES

THE TOOLKIT

The toolkit combines information and resources developed by various organizations on disaster risk reduction and management (DRRM) in schools. It is tailored for high-risk school communities in the region within the context of education for sustainable development. It presents important key concepts and examples of disaster risk reduction and management at the school level. It is intended for school heads and teachers to help them coordinate, set up, maintain and sustain effective DRRM programs in their school communities.

The toolkit is SEAMEO INNOTECH's contribution to education in emergencies and disaster risk reduction and management – one of the 10 collaborative projects of the 11 SEAMEO member countries for reaching the unreached to achieve Education for All by 2015.

The toolkit is broadly anchored on the **Minimum Standards for Education in Emergencies** set forth by the Inter-agency Network for Education in Emergencies (INEE) and on the **Safe School Framework** authored by Save the Children International.

KEY THEMES

- 1 Disaster profile and status of disaster risk reduction and management in Southeast Asia
- 2 Initiatives and innovations for safer schools in Southeast Asia
- 3 Anthology of reference materials
- 4 Disaster risk profiles and DRRM efforts of SEAMEO member countries
- 5 Selected organizations involved in DRRM projects in the education sector
